This supplements the details submitted to FIDIC in November 2019, and is to give four areas of my experience in adjudication besides my service as an adjudicator. Also I attach a List of Representative Projects on which I have assisted, to supplement the geographical and technical data in the November 019 submission to FIDIC.

**Example 1: Collaborative work in establishing adjudication provisions**

Consultant to World Bank Legal Department on DRB provisions of its January 1995 SBD "Procurement of Works" when introduced frit use of DRB.

Served on Sub-Committee advising on revision of BAC Construction Dispute Board Rules.

Served on Team drafting DRBF Manual and revisions to it.

Invited Reviewer on draft FIDIC Conditions, with particular emphasis on DAB provisions [GLJ check books' listings]

**Example 2: Advising clients on adjudication clauses in their contracts and on selection of adjudicators**

Advising client on adjudication clauses in their contracts is a regular feature of my work, whether for Employer, Engineer, or Contractor & when for the Engineer or the Contractor, typically includes work on relevant dispute provisions of respectively sub-consultant or sub-contractor agreements.

Assistance to clients on identifying and selecting adjudicators has included DABs for projects such as:

Contract BC - 1, Bosphorus Rail Tube Crossing Project (Marmary), part of Istanbul upgrading of commuter rail system, including design/build world's largest submerged tunnel, and 3 stations, largely underground. Advised on selection of 3-person DAB.

Panama Canal Expansion: 3rd set of locks, including: dredging 7.1 m³; concrete, 5 M m³; concrete steel, 270K tons; excavation, 7.4M m³; backfill, 18M m³; steel for sluice gates & valves, 71K tons; sluice gates (16), 10m wide, 58m long, height 23 - 33m; buildings (96), 40K m². Advised on selection of 3-person DAB.

Sondu Miriu Hydropower Project, Kenya: KES 2.2 Billion (US$ 33 Million) Construction of a 60MW (2 x 30MW) Power Station; run-of-river scheme transferring the water of the Sondu River to Kano Plains through a headrace tunnel, penstock and power station harnessing 200 m water head. I introduced mediator who successfully settled all claims arising from construction.
Example 3: Assisting clients in working with adjudicators:

DABs for motorway projects in Kazakhstan, Romania, Ukraine; DABs for dams in Namibia and Uganda.

Example 4: Training & writing for publications on adjudication:

Developing training materials and conducting training of varying duration for IDLO. At Rome headquarters it had 13-week residential course on business law for lawyers from developing countries and I taught two-day segment on "Procurement of Construction", focused on FIDIC Red Book, including DAB principles and procedures. Also conducted workshops in developing countries (e.g. Bangladesh, China, Nepal, Philippines) on dispute prevention and resolution.

* * * * * *

My goal in all of my work in adjudication is to assist the Parties and the Engineer/Employer’s Representative to deal with Project problems, without having to make formal referrals to the Board and if a ‘referral’ is made my goal is to resolve the dispute amicably without resort to arbitration or litigation. In short, using the words of the attached letter of appreciation, I seek to “walk with the parties….to successful completion of the Project”.
REPRESENTATIVE INTERNATIONAL CONSTRUCTION PROJECTS

Akosombo Hydroelectric Project, Ghana
Alexandria National Steel Company Project, Egypt
Anglesey Aluminium Smelter Project, Wales
Arab Cement Company Cement Plant, Sudan
Arab Iron and Steel Company Iron Ore Pelletizing Plant, Bahrain
Atyrau-Aktau Road Reconstruction Project, Karabatan-Dossor Section, Kazakhstan
Bakun Hydroelectric Project, Sarawak, Malaysia
Baneasa Project, Bucharest, Romania
Bujagali Hydropower Project, Uganda
Cebu Coastal Road Project, Philippines
Ching Fong Haiphong Cement Factory, Vietnam
Cirata Hydroelectric Project I, Indonesia
Cirata Hydroelectric Project II, Indonesia
Coastal Belt Water Project, Libya (also known as the Great Man-Made River Project)
Construction Materials Industries, O.S.C., Lime Brick Plant, Oman
Delimara Power Station, Valetta, Malta
Dhamar-Al Baidha Road Project, Yemen
Dodoma Manyoni Highway Project, Tanzania
East-West Highway Project, Malaysia
Eurallumina, S.p.A., Alumina Plant, Sardinia
Feeder Roads Project, Nepal
Fuhaieh Cement Project, Jordan
Fujairah Cement Industries, Cement Plant, U.A.E.
Gulf Cooperation Council Electricity Grid Interconnection, Bahrain
General Hospital, Colombo, Sri Lanka
Ghazi Barotha Hydropower Project, Pakistan
Gilgel Gibe Hydroelectric Project (Phases I, II, III), Ethiopia
Grand Ethiopian Renaissance Dam Project, Ethiopia
Gulf Aluminium Rolling Mill Company Project, Bahrain
Guri Hydroelectric Project, Venezuela
Iranian road, highway, irrigation, and residential developments (various)
Japan Air Lines Cargo Terminal, JFK International Airport, USA
Kampala Northern Bypass Project, Uganda
Karawang Golf Course and Housing Project, Karawang, W. Java, Indonesia
Katsina Steel Rolling Mill Project, Nigeria
Khanpur Potable Water Supply Project, Pakistan
King Saud University, Riyadh
Kossou Hydroelectric Project, Ivory Coast
Kota Kinabalu Port Expansion, Sabah, Malaysia
Kremasta Hydroelectric Project, Greece
Kuala Lumpur International Airport, Main Passenger Terminal, Contact Pier and Baggage Handling System, Malaysia
Kunming Zhangjiuhe River Water Diversion and Water Supply Project, China
Lahad Datu Port Expansion, Sabah, Malaysia
Lesotho Highlands Water Project - Katse Dam
Lugoj-Deva Motorway Lot 2 construction, Romania
M03 Road (Kyiv-Kharkiv-Dovzhansky) Reconstruction Project, Ukraine
Manila, South Harbor, Pier 5 Extension, Philippines

The ENGINEER
Construction Supervision ELECTROWATT-GHIDRI-Kunming

The EMPLOYER
Kunming Zhangjiuhe River Water Diversion Construction and Water Supply Project Administration Bureau

Dear Sirs,

We are pleased to inform you that the Employer and the Contractor have amicably reached a package agreement dated January 21st, 2014 for final settlement of CW-Lot I of Kunming Zhangjiuhe River Water Diversion and Water Supply Project, fully closing all the pending matters in connection with Lot I.

As per this package agreement, the Employer will make a last payment of CNY34120000 to the Contractor before May 15, 2014. Actually, on the 22nd of April 2014, the Contractor has received this payment from the Employer. Thus, the Contractor confirms that all the payments stipulated in the final settlement package deal agreement have been made to the Contractor as programmed, while the Contractor will properly settle final payments with the Subcontractors as already confirmed in the above-mentioned final settlement package deal agreement. Besides that, all the required documentation has been properly submitted by the Contractor and the Subcontractors as required and also accepted by the Employer. The Employer confirms that the Contractor has fulfilled all his contractual obligations to the satisfaction of the Employer. The Engineer has issued a Final Payment Certificate to the Contractor with copies to the Employer dated April 20th of 2014.

Therefore, the Employer and the Contractor will terminate the agreed DAB services from May 1st, 2014.

At this moment, both the Employer and the Contractor would like to express our deepest gratitude to the DAB members who walked with the parties through the whole project particularly the most difficult stages, guiding the parties to build mutual acceptable procedures to solve possible disputes. With your constant care and encouragement, it is finally possible the two parties amicably reach the final settlement package agreement. Again, we would like to give our sincere thanks and appreciation to the DAB members for your tremendous contribution to the final completion and a successful closure of the Project.

Signed for and on behalf of

The Employer, Kunming Zhangjiuhe Water Diversion and Water Supply Project Construction Bureau, by
Mr. Lai Baoheng

The Contractor, Cooperative Muratori e Cementisti - CMC di Ravenna by
Mr. Salvatore Casciaro
